PROJECTS

Personal Website

Software Developer

Tallahassee, FL

2023

October 2023 – Present

- Using JavaScript, designed and developed a personalized website showcasing my skills, projects, and educational background, providing a comprehensive overview of my expertise.
- Utilized HTML, CSS, and other web development tools to build and maintain the website, demonstrating proficiency in front-end web development.
- Implemented links such as LinkedIn, Email, and Resume

Yahtzee Game

Software Developer

Tallahassee, FL

November 2023 – December

2023

- Engineered an interactive Yahtzee game in Java, showcasing strong programming skills and a deep understanding of object-oriented principles.
- Implemented a user-friendly interface with graphical components, allowing players to roll dice, track scores, and enjoy a seamless gaming experience.
- Incorporated robust game logic, including scoring calculations, error handling, and interactive prompts, ensuring a smooth and enjoyable gameplay for users.

Weather Website

Software Developer

Tallahassee, FL

November 2023 – January

2023

- Developed and implemented a dynamic and responsive weather website using JavaScript, HTML, and CSS, providing users with real-time weather updates and forecasts.
- Designed an intuitive user interface (UI) for the weather website, ensuring a seamless and visually appealing experience for users to access weather information on different devices.
- Integrated third-party APIs to fetch and display accurate weather data, demonstrating proficiency in API usage and data manipulation to enhance the functionality of the website.

INVOLVEMENT

Men's Club Soccer, Florida State University

Member

Tallahassee, FL

September 2023 – Present

- Contributed actively as a dedicated member of the school's club soccer team, demonstrating commitment, teamwork, and a passion for the sport.
- Collaborated with teammates and coaching staff to foster a supportive and cohesive team environment, enhancing camaraderie and overall team spirit.
